

Take routine documents out of your routine

Legal documents are challenging to manage. Once, companies only had two ways to handle them: engage an expensive, traditional law firm or use internal staff. Both pull focus away from high-value, strategic work and can slow business processes, leading to missed opportunities, lost revenue, and increased risk.

Ontra provides a smarter way to negotiate and manage the widening flow of routine contracts and complex agreements. Combined with a virtual network of lawyers, our complete solutions automate and optimize contract processes from negotiating terms to benchmarking precedent to unlocking valuable data and insights.
